CALL FOR PAPERS

The Steering Committee for the Graduate Conference in Classics, Philosophy and Ancient Science at the University of Pittsburgh requests submissions for the Conference on

> Ideas in Motion Evolution of Ancient Philosophical Ideas

February 25-26, 2000

Keynote Address Professor John Cooper, Princeton University

Philosophical and scientific ideas are not static—rather they grow and evolve much like living beings. The papers to be presented at our conference will examine this dynamic process in the ancient world (up to roughly the middle of the sixth century AD) and reveal the extent to which certain philosophical ideas are handed over from one thinker or school to another, and, in the process, are manipulated and accommodated to the features of the 'adoptive' system of thought. (We will also consider papers dealing with the evolution of ideas within a single school or author.) Such a dynamic approach should point out specific factors that guided the historical evolution of philosophical and scientific concepts or theories.

The Committee invites graduate students and recent Ph.D.'s (i.e., those who have received their Ph.D. within the last two years) to submit abstracts of one page that address such issues. Abstracts must be received by January 5, 2000. Please address to Tiberiu Popa (by e-mail: tmpst26+@pitt.edu; by fax: 412-624 4419, by mail: Department of Classics, 1518 Cathedral of Learning, University of Pittsburgh, Pittsburgh, PA 15260).

Questions about the conference can be forwarded to any of the following members of the steering committee: David Berger, Warren Dawkins, Francesca Di Poppa, Maria Dridaki, Tiberiu Marcel Popa, and Peter Spillman.
